(BN) Encana Says EPA Should Withdraw Pavillion Fracking Report

Richard/Alisha - Do you guys have any comment on Encana saying EPA should withdraw its Pavillion draft report, because of flawed design and evidence not backing up your results? Let me know. Thanks, Mark

By Mark Drajem

Dec. 6 (Bloomberg) -- The Environmental Protection Agency should withdraw a draft report that linked water contamination in Pavillion, Wyoming, to hydraulic fracturing because the conclusions are not backed up by the agency's own evidence, an official at gas-driller Encana Corp. said.

David Stewart, Encana's environment, health and safety lead for Wyoming, spoke to reporters today on a conference call a year after the EPA's initial report was released.
